SAKSHI

Phone Number:	+91 8650257703
Email:	reach.sakshiverma@gmail.com
Current Address:	C/o Ram Naresh Singh
	Near Katyani Health Centre | Sonawati Colony
	Dist. – Sitamarhi | Bihar | Pin No. – 843302

OBJECTIVE

To obtain a challenging position that will utilize my skills and expertise while also giving me a platform to develop new skill sets fulfilling my quest to make a difference.

Career Summary

- Software Engineer at SoftSol   Feb 2024 – Jun 2024
- Analyst at Tredence Inc.   Jun 2021 – Nov 2023

Skills Summary

- **Full-Stack Development**: Proficient in React, Redux, Next.js, and Sequalite managing end-to-end development for internal projects.

- **API Integration**: Successfully integrated Microsoft API for calendar syncing with Outlook.

- **Cloud Services**: Utilized Microsoft APIs for cloud functionality, integrated Azure Blob storage, and worked with GraphQL for optimized data queries.

- **UI Design**: Created user-friendly dashboards with dynamic elements, enhancing overall user experience.

- **Security**: Implemented secure authentication (NextAuth) and access control measures.

__Languages/Frameworks:__

Front End: **Next.js,React.js, Redux, HTML5, CSS, Javascript**, **Bootstrap**, **Ant Design, Material UI, ES6/7**

Back End: **NodeJS**, **Express.Js**

Database: **MongoDB, Postgres**   **Version Control**: **GitHub, Azure DevOps, Jira**

Env: **Windows, Linux, Mac (CLI operations)**   **Package**: **NPM, YARN**

Education :

B.Tech.	**College Of Engineering Roorkee (UTU)**	**67.3%**	**2019**
Intermediate	**CBSE**	**71.8%**	**2015**
10th Board	**CBSE**	**9.4 CGPA**	**2013**

Project Summary and Experiences

Name: Patching Acceleration   **Role: Full Stack Developer**

Internal Broadridge   **2024 Feb – 2024 Jun**

Broadridge Financial Solutions historically deployed every application on 200-300 on-premise servers across different environments (development, QA, UAT, and production). These servers, running either Windows or Linux operating systems, require monthly patching to update their versions. After a thorough comparison, BladeLogic was chosen as the preferred automation tool to automate the entire patching activity. An internal tool was developed for managing those on-premise servers.

Responsibilities:

- Bootstrapped the entire project from scratch.
- For frontend used React.js, and Node.js was used for the backend.
- Integrated with other internal tools and services.
- Worked on React flow.

Name: CSAT Project   **Role: Full Stack Developer**

Internal Tredence   **2023 Jun – 2023 Nov**

As a key contributor to the CSAT project - an internal project that helped show analytics for Survey Monkey Data- I played a pivotal role in developing a dynamic Next.js application. The application utilized NextAuth for secure authentication, ensuring a seamless and protected user experience.

Responsibilities:

- Implemented Next.js to create a responsive and efficient user interface.
- Integrated NextAuth for role-based authentication, enhancing the security features of the application using Azure.
- Successfully imported data from Excel sheets into a PostgreSQL database, streamlining data management processes.
- Designed and developed a user-friendly UI featuring interactive elements such as tables, pie charts, and bar charts to present data comprehensively.
